

## SauceDemo Bug Report

**Bug ID:** BD-001

**Title:**

User is able to proceed to checkout with an empty cart

**Severity:**

High

**Type:**

Functional

**Description:**

User is able to proceed to checkout without any items in the cart.

**Steps to Reproduce:**

1. Login with username: "standard\_user" and Password: "secret\_sauce"
2. Click on cart icon
3. Ensure cart is empty
4. Click on "Checkout"

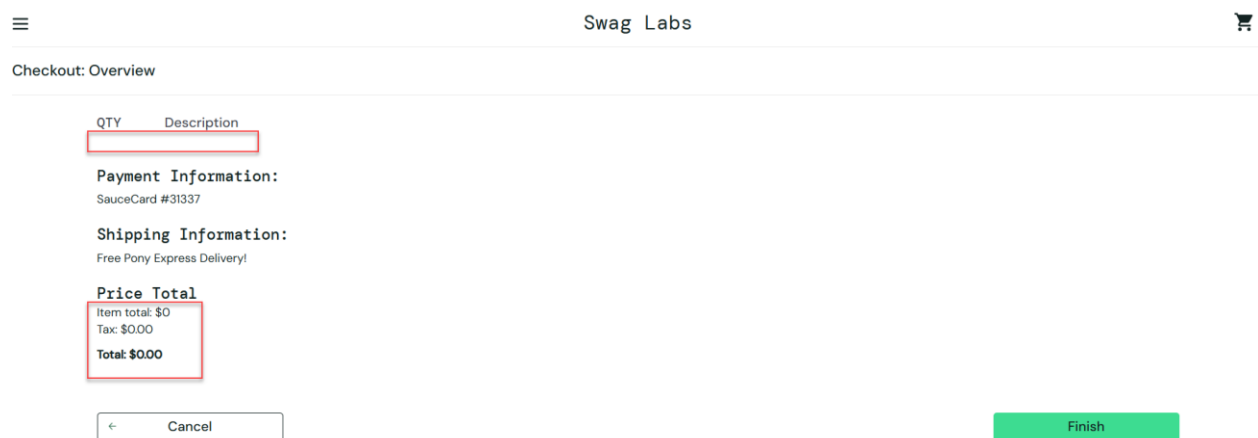

**Actual Result:**

User is redirected to checkout page

**Expected Result:**

User should not be allowed to proceed to checkout when cart is empty. A validation message "Your cart is empty" should be displayed.

**Bug ID:** BD-002

**Title:**

Quantity field is disabled on cart page

**Severity:**

Low

**Type:**

Enhancement (UI/UX)

**Description:**

User cannot update product quantity from the cart page because the quantity field is disabled.

**Steps to Reproduce:**

1. Login with username: "standard\_user" and Password: "secret\_sauce"
2. Add product to cart
3. Go to cart page
4. Observe quantity field

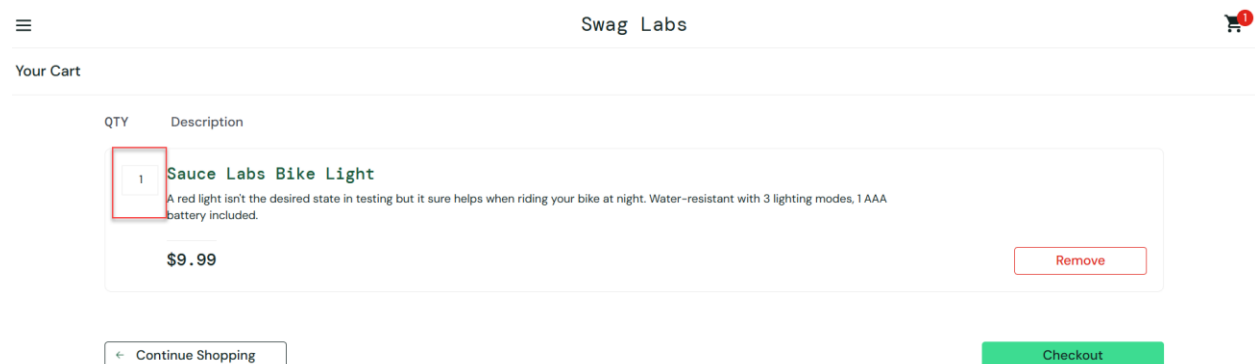

**Actual Result:**

Quantity field is disabled and cannot be edited.

**Expected Result:**

User should be able to update quantity directly from cart page for better usability.

## Bug ID: BD-003

### Title:

Incorrect product images displayed for multiple products (problem\_user)

### Type:

Content / UI

### Severity:

Medium

### Description:

When logged in with “problem\_user”, multiple products display the same image (dog carrying a ball) instead of showing their respective product images. This affects product visual identification.

### Steps to Reproduce:

1. Login with username: “problem\_user” and Password: “secret\_sauce”
2. Navigate to Products page
3. Observe product images for different items

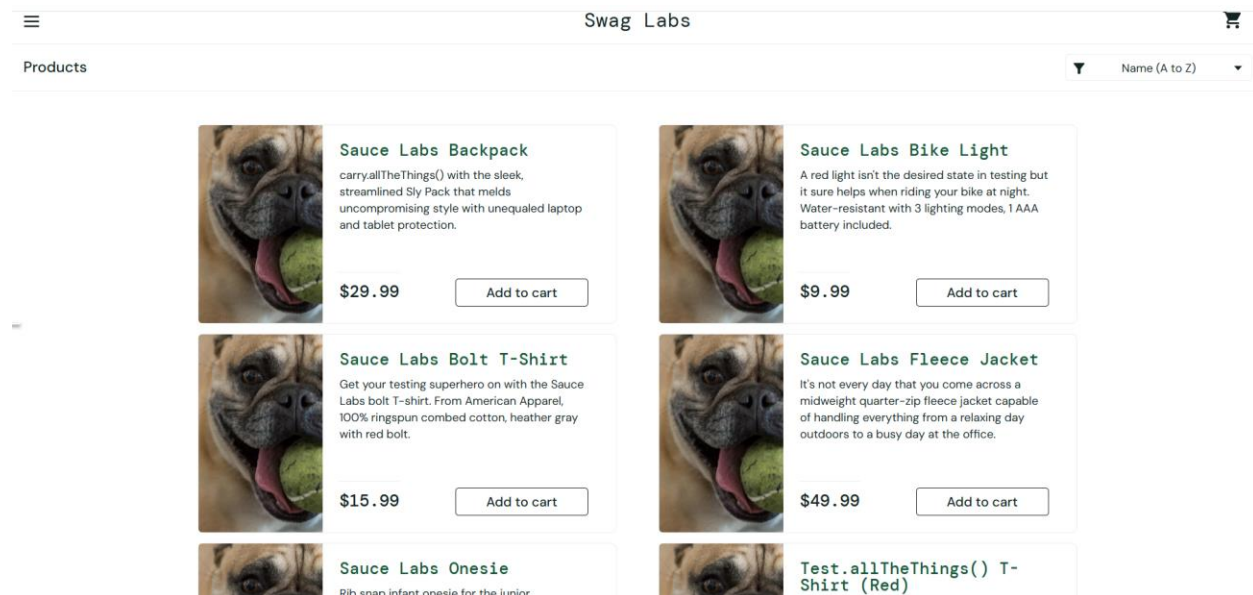

### Actual Result:

All or multiple products display the same image (dog carrying a ball).

### Expected Result:

Each product should display its correct and unique product image.

### Title:

Error message displayed when applying sorting filter (error\_user)

### Type:

Functional

### Severity:

High

### Description:

When logged in with “error\_user”, applying any sorting option on the Products page results in an error message being displayed instead of sorting the products.

### Steps to Reproduce:

1. Login with username: “error\_user” and Password: “secret\_sauce”
2. Navigate to Products page
3. Click on sorting dropdown
4. Select any sorting option (e.g. Price Low to High, Price High to Low, Name A-Z)

### Actual Result:

An error message appears:

“Sorting is broken! This error has been reported to Backtrace.”

Products are not sorted.

### Expected Result:

Products should be sorted correctly based on the selected option without any error message.
